Sharvil Parekh

TECHNICAL SKILLS

Languages
Experienced:
Java, HTML/CSS (Bootstrap), C#
Familiar:
Python, Javascript

Tools
Git, Visual Studio, Sony Vegas, Photoshop, Final Cut Pro

Personal Projects

UMD Bus Nav
- Leveraged UMD's student run API to create an app that would find the most effecient bus route for students

Terrapin Nav
- Published an Amazon Echo Skill for UMD students to find out how long it takes to walk from one building to another

EDUCATION
University of Maryland
B.S. Computer Science
Fall 2016 - May 2020
College Park, MD
Community Service: 237 hours

AWARDS
AP Scholar with Distinction
-Average of at least 3.5 on 5 or more AP exams

Community Service Award
-Over two hundred community service hours

INTERESTS
- Computer Science
- Hackathons
- Cybersecurity
- Video Editing

WORK EXPERIENCE

Research and Development Intern
Weatherbug | May 2016 - Aug 2016
- Development of a personal weather station dashboard website serving 5000 users
- Worked with a team of two interns under a project manager
- Wrote the back-end in C# using SignalR to allow for real time data exchange
- Maintained deployment of site on an Amazon EC2 Instance running IIS
- Created front end UI using Bootstrap
- Managed the capture of UDP data for historical graphs
- Tasks included creating a live weather data graph, live weather data tables, and multiple historical data graphs

Intern
Department of Environmental Protection | Jun 2015 - Aug 2015
- Helped map storm water retention facilities on aerial maps using ArcGIS
- Managed Excel data entry of storm water retention facility plans
- Planned and set up local public outreach events

Hackathons

MLH Prime | Participant | Aug 2016
- Fabricated a smart pill dispenser using a Raspberry Pi, Android app, and web app.
- Implemented Twilio's Sync API to allow the three platforms to communicate in real time

Bitcamp | Best use of Internet Sourced Data | April 2016
- Utilized a Raspberry Pi and an Arduino to create a gas sensor that notifies a user with text and image when a gas leak or smoke is detected

HackUMBC | 3rd Place Overall | March 2016
- Developed an Android app that helps map pothole through crowdsourcing
- A GPS flare would be emmited to a firebase database when the phone's accelerometer detected a pothole

HackTJ | Participant | Feb 2016
- Designed a web app that suggests new restaurants in the user's vicinity based on past transactions through the use of the Capital-One and Yelp API

HackRPI| Participant | Nov 2015
- Created a sound synthesis application in Python using a Leapmotion

Extracurriculars

MC Programming Competition | 1st Place | May 2015/16
- Competed with other high schools in the area in a Java programming competition
- Problems varied from basic programming such as loops/conditionals, arrays, to data structures.

MCPS Cybersecurity Competition| Participant | Feb 2016
- Participated in NYU Polytech's cybersecurity forensics challenge involving data scraping and other cybersecurity skills
